

Global Project Manager – UK or Belgium
Help us transform patients' lives

About UCB

At UCB, we put our heart, soul and skills into making a difference for people living with chronic disease. Working together to push the boundaries, we blend the best of our talents to unlock innovation. Will you join us in our pioneering adventure?

To strengthen our **Project Management** Group, we are looking to fill the position of: **Global Project Manager**.

About the Role

You will be responsible for:

- Drive the development of differentiated patient solutions through coordinating the Project team's strategic plan via the Target Patient Value Profile (TPVP) and Integrated Evidence Planning (IEP).
- Align key messages for UCB governance bodies and manage internal and external interfaces for the project through a comprehensive communications plan.
- Design the projects using relevant project management frameworks and methodologies such as scenario planning, building business cases, trade off analyses etc.
- Share Information transparently across the organization as single point of contact for project planning and budget.
- Motivate and Guide the project team to deliver the project, including advocated a continuous feedback culture through managing lessons learned or similar.
- Plan, track and monitor project progress across all missions (for late projects) or sub-teams (for early projects), managing risks, issues and opportunities during project execution
- Representation of the project at Governance and deputize for Patient Solution Lead/Mission Head, when requested.
- Train others in the PVU/PST and Missions/Sub-teams on project management concepts and processes as appropriate. Ensure onboarding of new PVU/PST members

About You

You should have:

- Bachelor's degree in a related subject and ideally, Project Management Certification
- At least 3 years of experience in Project Manager Role, or related function, within Pharmaceutical Industry, ideally in Research and Development Setting
- Experience of working in global environment, with demanding timelines and complex deliverables
- Relevant competencies, specifically:
 - Communications, Change and Conflict Management
 - Biopharma Acumen
 - Critical Thinking
 - Planning, Scheduling and Resourcing
 - Risks, Issues and Opportunities Management
 - Transition and Quality Management

UCB is a global biopharmaceutical company. We focus on discovering and developing innovative medicines and lateral solutions that can transform the everyday lives of people with severe diseases of the immune system – or the central nervous system.

With more than 8500 people in approximately 40 countries, UCB offers an exciting working environment where initiative can flourish and those with a 'can-do' attitude can thrive. Scientific excellence, innovation, co-creation, lateral thinking, reinventing the way we do things...these are some of the key competencies we are constantly developing, and looking for, at UCB.
